Essentials vs Accessories

Indoor comfort in your home is about more than just adjusting the temperature on the thermostat. Many homeowners overlook the need for necessary components and systems that can improve the indoor air you breathe. Indoor air quality products and systems are quite frequently treated as accessories. We define them as indoor air essentials.

An air conditioner's partner

A central air conditioner removes humidity from inside air while cooling your home to the temperature you have set on your thermostat. During spring and fall, when outdoor temperatures are more moderate, your air conditioning system may not need to run to maintain a comfortable indoor temperature. But if indoor humidity remains high, this can make your home uncomfortable and that's where a dehumidifier can save the day. When the humidity level in the home is higher than the setting on the dehumidistat, the dehumidifier will run, lowering the relative humidity in your home. In this way, you can enjoy automatic year-round comfort in your home.

An easy solution for year-round whole-home humidity control

A whole home dehumidifier removes humidity from the air using the same process as a central air conditioner. The DV Series Dehumidifier works in conjunction with your central AC system or operates independently as needed to maintain a comfortable humidity level in your home. Unlike a portable dehumidifier, which only removes humidity in the proximity of the room where it is located, a DV Series Dehumidifier attaches to the ductwork, providing dehumidification throughout your home. It is controlled by a dehumidistat, which monitors and controls the humidity levels in your home year-round.

Whole-Home Dehumidifiers

Why buy a dehumidifier?

Clean Comfort DV Series Dehumidifiers remove moisture from your home's air, helping to keep the indoor environment comfortable.

Benefits include:

- Enhanced comfort: Consistent humidity control, especially in the milder seasons when your central AC may not be required
- Cleaner, fresher air: The DV Series Dehumidifier's pleated media filter cleans your home's air as it dehumidifies. And when used with the DVP digital control and a mechanical damper, it can bring fresh outdoor air into the home

Why is my portable dehumidifier not sufficient?

Stand-alone or portable dehumidifiers simply cannot support a home's total humidity control requirements. They are only capable of providing humidity control in the proximity of the room where they are located. Whole-home dehumidifiers provide humidity control to all of the conditioned air flowing through the home and do not deposit dried mineral dust on the floor like portable dehumidifiers can. Whole-home dehumidifiers also do not require manual refilling or cleaning like portable units.

Room/Portable vs Whole-Home

PURE. CLEAN. AIR.

Whole-home indoor air quality solutions

Clean Comfort Indoor Air Essentials can improve the quality and comfort of your home's indoor air. Components can be installed on virtually any brand of HVAC equipment in any home or installation. (For illustration purposes only, we have shown a basement installation.)

- Filtration
- Humidity Control
- Dehumidification
- Purification
- Ventilation

Our complete family of Clean Comfort products improves indoor air quality:

Filtration

Air filtration systems capture up to 95% of particles ranging in size down to 0.3 micron and keep them from recirculating back into your home's air.

- 5-Stage Air Treatment
- Hepa Air Cleaner
- Media Air Cleaner
- Electronic Air Cleaner
- Hybrid Air Cleaner
- Replacement Filters

Humidity Control

Dehumidifiers and humidifiers work with the home's heating and cooling system to help maintain a comfortable humidity level in every room.

- Whole-Home Humidifier
 - Bypass Evaporative Humidifier
 - Steam Humidifier

Dehumidification

Dehumidifiers work with the home's heating and cooling system to help maintain a comfortable humidity level in every room.

- Whole-Home Dehumidifier

Purification

Air purification systems are attached to the furnace or air handler, contaminants are deactivated before the air is recirculated back into the home.

- In-Duct Air Purifier
- Coil Purifier
 - For Furnaces
 - For Air Handlers

Ventilation

Ventilation systems replace stale indoor air with outdoor air — providing the fresh-air feel of an open window, with minimal heat/energy loss.

- Heat Recovery Ventilator (HRV)
- Energy Recovery Ventilator (ERV)

Additional information

Before purchasing this appliance, read important information about its estimated annual energy consumption, yearly operating cost or energy efficiency rating that is available from your retailer.
